

How to make a Locking Gas Cap for your Elise that fits Correctly

By ELISETALK'S elisenc

Below is the Stant Cap before any changes:

There is a plastic ring on the bottom of the black part of the cap. Using a small screwdriver, pry this off, as shown below:

Once the ring is removed, you can begin removing the center threaded portion of the cap:

Here is the Jaguar gas cap, compared to the Lotus, you can see that they are not even close:

Now perform the same steps to your Elise's gas cap.

Now that the ring is removed from the Elise's gas cap, take out the center white portion. place it in the Stant black cap as shown below:

Re install the Stant ring, locking the Elise's fuel spout fitting onto the Stant locking gas cap.

You now have a correct locking gas cap for your Elise!

The above instructions are provided as is, and without any warranty. If you break your gas cap, don't expect a replacement from me.
