

TRACK USE PRECAUTIONS

Lotus models are designed as road going sports cars. It is recognised that owners may wish to use their car occasionally on closed circuits or private test tracks in order to experience the car's full range of dynamic capabilities. However, use of the car in a competitive manner, including timed runs or laps, is not endorsed by Lotus, and the greater degree of wear and tear and the effects of increased stress on parts and components will not be covered by the vehicle warranty.

WARNING: Any type of timed, competitive vehicle use requires that a suitably qualified specialist apply expert levels of vehicle preparation and servicing, over and above that specified in the Maintenance Schedule; consult your Lotus dealer in the first instance. Vital information on suspension torque settings and safety precautions are available in the Service Notes manual for the vehicle concerned, which may be ordered from any Lotus dealer.
