Technical Bulletin

Subject: Roof Display for Compass, Adapting to Stay On With Ignition

Group: 91

Number: 03-01

Model(s): Touareg

2004

Date: Aug. 14, 2003

Condition

Customer is concerned that the roof display for the compass stays on for only a few seconds.

This is the normal operation of the compass display.

The compass may be adapted so that it is displayed whenever the ignition is on.

Production

Changed as of VIN: WVGEM67L24D010889

Service

With VAS 5051 / VAS 5052 Diagnostic tool connected to the vehicle:

- Select "Vehicle Self-Diagnosis" and then select "6E" for Roof Display
- Select function "10 - Adaptation".
- Select channel "1".
- Change value to "0" and store value.
- ◆ 0 = display always ON (with ignition switched ON).
- ◆ 1 - 255 = display stays ON for specific time depending on input value (with ignition switched ON and display button pushed).
